DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 16-18, 37-39 and 42, drawn to data manipulation in a server classified in class 345, subclass 472 and/or 157.
 - II. Claims 26-36, 40 and 41, drawn to initiating multiple sessions simultaneously, classified in class 455, subclass 552.1 and/or 557.

The inventions are distinct, each from the other because of the following reasons: Claims 16-18, 37-39 and 42 require data sent through a data network to be manipulated by functions such as zooming and fast forwarding while claims 26-36, 40 and 41 require initiating multiple sessions simultaneously while having the capability to stop and resume the sessions in different devices.

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 2617

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
